

Enabling Multi Factor Authentication

Steps to enable multi factor authentication using google authenticator

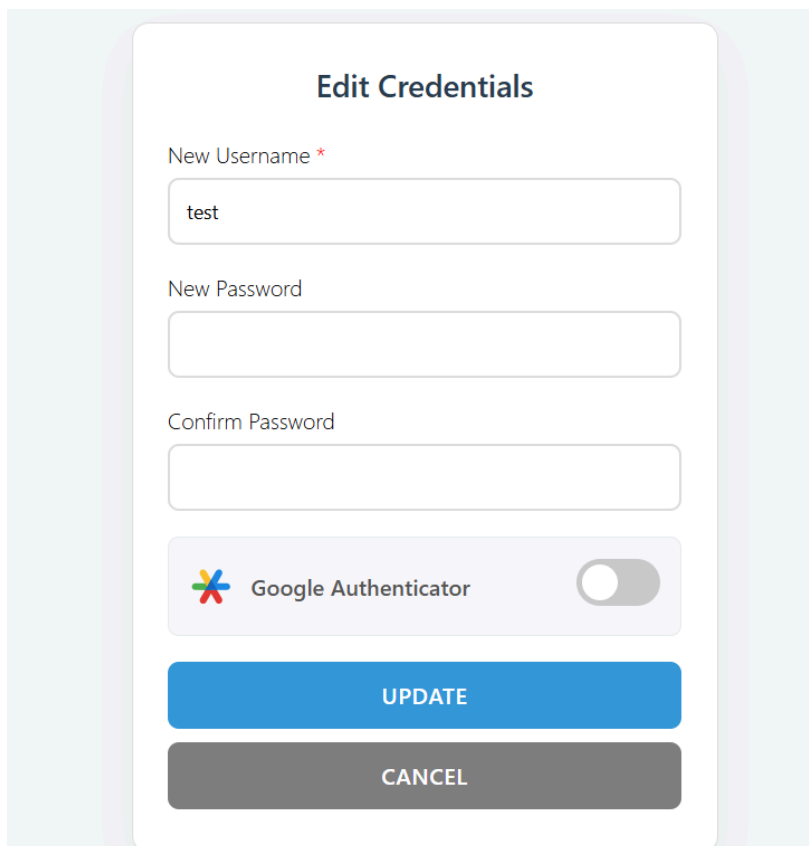

1. Find the Edit Credentials button in header and click it.

Edit Credentials

Manage Players ▼

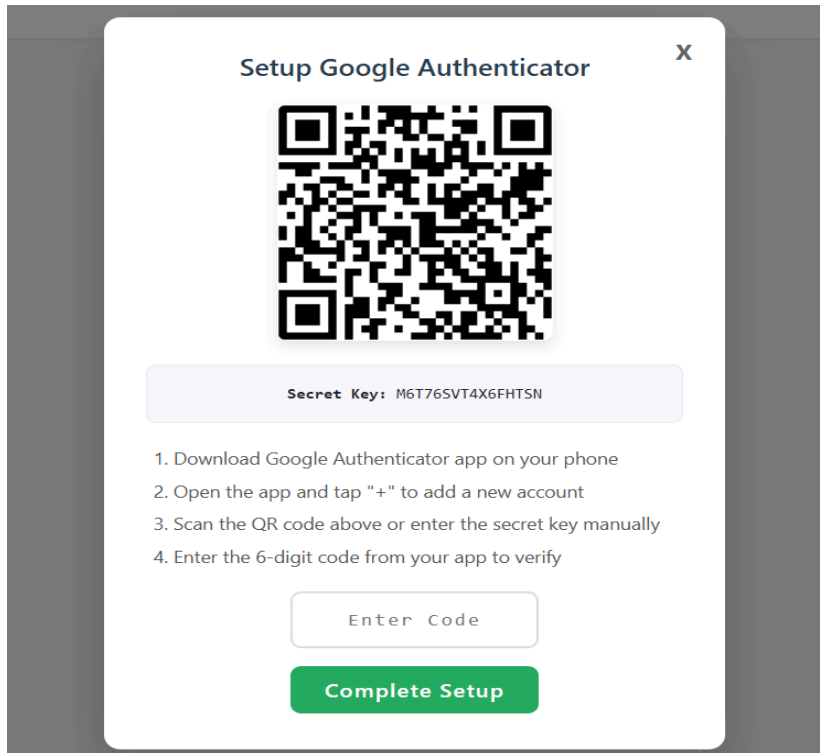

Logout

2. Enable the toggle button for google authenticator.

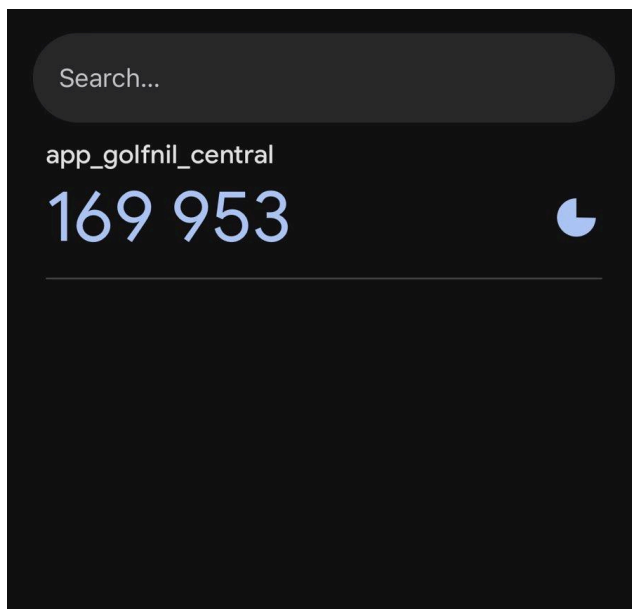

The screenshot shows a modal window titled "Edit Credentials". It contains three input fields: "New Username *" with the value "test", "New Password", and "Confirm Password". Below these fields is a section for "Google Authenticator" with a toggle switch that is currently turned off. At the bottom of the modal are two buttons: "UPDATE" (blue) and "CANCEL" (grey).

3. A popup will show. Follow the steps written on it.

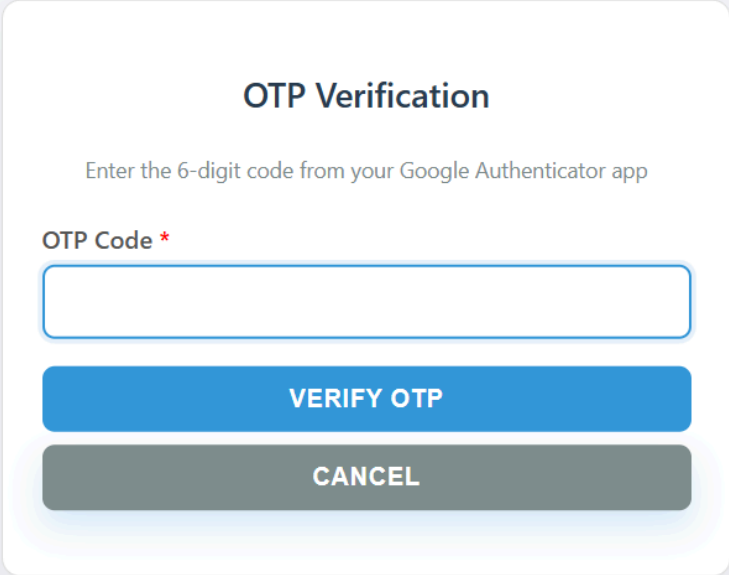

4. You will be able to see the username like **app_golfnil_central** in your device with an otp.

5. **From your next login**, after entering your username and password, you'll be prompted to enter a one-time password (OTP). Open your authenticator app on your device to view the code and enter it.

Note: This OTP refreshes every 30 seconds.

The image shows a modal dialog box titled "OTP Verification". Below the title, it says "Enter the 6-digit code from your Google Authenticator app". There is a text input field labeled "OTP Code *" with a red asterisk. Below the input field are two buttons: a blue "VERIFY OTP" button and a grey "CANCEL" button.

OTP Verification

Enter the 6-digit code from your Google Authenticator app
