Task 1

Need weekly update to follower counts for Instagram mapped to Monday. Right now, we approximately 400 handles, but we're working to collect for all 3,000 players over the coming weeks.

Task 2

For all of the sites, we need the player name and their ranking number collected once per week. Then we would need this information synched to our board in Monday.com.

For sites that have one additional piece of data (e.g., school or country), we only need this information approx. 3 times per year: the first time we add the name and one other time each in the summer and fall.

In terms of "bulk data," we're just using this term to indicate that we're collecting this for several players, varying in quantity from 35 – 1000 athletes per site. See the colum below for how many players per site.

The sites:

	Site	URL	# of Names & Rankings to Collect (Weekly)	Additonal Data to Collect (3 times per year)	Notes
1A	WAGR (Men)	https://www.wagr.com/mens-ranking	First 1000	County	There is also a download file
1B	WAGR (Women)	https://www.wagr.com/womens-ranking	First 1000	Country	There is also a download file
2A	AJGA Boys	https://www.ajga.org/rankings/boys	First 500		
2B	AJGA Girls	https://www.ajga.org/rankings/girls	First 500		
3	Data Golf (Men)	https://datagolf.com/datagolf-am-rankings	Need All (Approx. 500)	School	
4	Clippd (Women)	Clippd Women	Need First 500	School	
5	PGA TOUR University	PGA TOUR U Full Rankings	Need All (Approx. 180)		
6	PGA TOUR University Accelerated	PGA TOUR U Accelerated	Need All (Approx. 35)		
7	LEAP	LPGA LEAP	Need All (Approx. 45)		Link for complete standings is at the bottom left of page

Task 3

Password protected site (we can share access)

Looking for best way to handle. We can create a CSV report but hoping there is a better way to automate

Need a single data number (audience count) extracted and mapped to Monday
